

Meeting Log for 3/17/2020

Attendance: Umar, Jack, Tim, Emma, Edward.

What we worked on: Got a better understanding of firebase and the database, figure out some styling and what we would want it to look like. We were able to set up a list of user to show up the add item pages, Handle the user's selections on the page and connect the information the the database.

Goals for next week: Figure out what tools we still need to learn for the calendar, read up on nodejs with the link Umar sent through basecamp to review. Since next week is spring break we might not plan on meeting (we'll see) but will look into the calendar feature within the app.

MEETINGS GO FROM 12:30-2:30
