

Meeting Log for 3/10/2020

Attendance: Umar, Jack, Tim, Emma, Edward.

What we worked on: Home page improvements especially styling

This meeting was mostly office hours into reactjs and firebase. We decided to stick with basecamp's todos so we know what to do, but we all wanted to better understand the project structure and how React Components work.

Goals for next week: look and see if we want to use bootstrap cards or custom options.

MEETINGS GO FROM 12:30-2:30
