

Meeting Log for 2/11/2020

Attendance: Umar, Jack, Tim, Emma, Edward.

What we worked on: Completed Milestone 2 document and have assigned roles for future features. Set up a minimum set of features and when they should be done. Also looked at options for backend and decided ReactJS + netlify + firebase should do the trick. Found a tutorial on making that all link together and we'll follow that

Goals for next week: Mess with Firebase linking and a sign up form. Everyone is doing this and will be on the same page hopefully by next week.
